SUMMARY

In 2019, I started to pursue my long-time interest in informatics and dived into software development field. Two bootcamps, one internship, one real life application and many trivial pieces of softwares later, I discovered that AI/ML and the real-life possibilities that such tools can enable for us are just thrilling.

IT experience

BOOTCAMP @ BeCode

Artificial Intelligence / Data Science | 2021 (7 mo.)

Data - Web scraping, data analysis, preprocessing and visualization.

Machine Learning - Prediction algorithms and procedures *i.e.* regression, classification, model evaluation.

Deep Learning: Natural Language Processing, Computer Vision and Neural networks.

PROJECT @ Bike Theft Tracker

Personal Project | 2020 (5 mo.)

Developed and released my first real-life application on Android platform.
Ongoing: Implementing artificial intelligence.

INTERNSHIP @ Speech Act Services

Mobile Application Development | 2020 (5 mo.)

Developing a full-stack mobile application under the supervision of a senior developer while taking responsibility in every aspect of the project, from design to planning and developing.

BOOTCAMP @ HackYourFuture

Web Development and Programming Basics | 2019 (7 mo.)

Fundamental training on HTML, CSS, JavaScript (NodeJS, ReactJS), Databases

Other professional experience

TECHNICIAN @ Telenia SRL.

Display technologies technical assistance | 2016 (6 mo.)

ASSISTANT MANAGER / FRONT DESK @ Hush Hostels

Management and customer services | 2015 (1.5 yrs.)

SOUND TECHNICIAN @ Acik radio

Live broadcast technician | 2012 (3 yrs.)
